Welcome X

Welcome to the Query Tool Workspace!

The Query Tool is a robust and versatile environment designed for executing SQL commands and reviewing result sets efficiently.

In this workspace, you can seamlessly open and manage multiple query tabs, making it easier to organize your work. You can connect to existing servers or create an ad-hoc connection to any database server as needed.

Let's connect to the server

Existing Server (Optional) PostgreSQL 18

Server Name PostgreSQL 18

Host name/address localhost

Port 5432

Database postgres

User postgres

Password

Role Select an item...

Service

Reset

Connect & Open Query Tool
